Explain your interest in this board/committee and why you think its issues are important

I saw that there was a vacancy on the PRAC, and if they're interested in interviewing me for filling that vacancy, I'll research the issues they're working on. As for TAC, our transportation department is on the precipice of a funding crisis. Our voices on TAC will be important in guiding the commissioners on where to cut services or find new sources of transportation revenue. There's a lot of appetite around the city for more sidewalks, bulb-outs and anything else that calms traffic and makes our streets safer for all users. As TAC members, it's our duty to help commissioners see the value in these street improvements and identify priority areas for investment.
